PRESS RELEASE

VINCI Park strengthens its presence in Canada

VINCI Park is pleased to announce an agreement with WestPark Parking Services Inc. (“WestPark”) for the acquisition of the assets of WestPark Calgary and the creation of a joint-venture in British Columbia.

Created in 2010, WestPark is a major player in the parking industry in Western Canada operating over 170 locations throughout British Columbia and the Province of Alberta.

For Serge Clément, President and CEO of VINCI Park: "This strategic partnership with WestPark allows us to become a major player in the province of Alberta and will also strengthen our position in British Columbia, providing a robust national presence in Canada. By combining our teams, we raise our level of expertise while creating a strong footprint in the region. As a well-established company, the addition of the WestPark team and their portfolio allows us to consolidate our operations in the region and strengthen our growth strategy.

John Lares, President and CEO of WestPark adds: "This is an opportunity to align ourselves with Vinci Park, a major player on the international scene that provides national exposure. The combination of our people and vast resources opens new business avenues for our respective teams who share a common goal to elevate the parking guest experience and the delivery of our services to each of our business partners."

This transaction fits into the Vinci Park strategy to geographically rebalance its operations, increase its presence in local markets, and benefit from the addition of exceptional talent. Together, both Vinci Park and WestPark in their relevant roles in key Western Canadian markets will benefit from the synergies of their people, systems and resources.

About Infra Foch

Infra Foch is a holding company whose 3 shareholders are ARDIAN, Crédit Agricole Assurances through its subsidiary Predica and VINCI Concessions. Infra Foch holds 100% of VINCI Park, which is the only asset of the company. VINCI Park, key global player in every area of urban mobility, manages 1.9 million parking spaces in 14 different countries. In 2014, its revenues and its EBITDA amounted to 733 million euros and 215 million euros respectively (Global Proportionate figures, pre IFRS 11).

About WestPark

WestPark began in 2010 with a simple goal: to bring an entrepreneurial spirit and new level of customer service to parking management.

Our fresh approach is evident in everything we do - from our innovative marketing strategies to the friendly and welcoming attitude of our people and customer-centred parking solutions. Operating over 170 parking facilities in Western Canada, we manage a wide variety of facilities and provide ground transportation logistics solutions. WestPark' success is defined by the strategic implementation and management of parking and transportation solutions. This is achieved through the support of an inclusionary and enthusiastic team culture that elevates a unique brand built on integrity, honesty and the pursuit of operational excellence.
