E-mobility

Indigo rolls out 500 recharging points across France

Since becoming partners in 2014, the leading global parking provider Indigo and the EDF subsidiary and e-mobility specialist IZIVIA have rolled out 500 charging points in France. 120 more charging points are currently being rolled out and will be accessible shortly, creating a national network of electric charging points to meet the growing need generated by our new mobility habits.

In 2018 alone, around **10,000 charges** were effected via IZIVIA points across the Indigo network. The points were accessed by **1,600 e-vehicle users** in 2018, delivering around **120,000 kWh**. The partnership is part of a global strategy for meeting two objectives:

- **Offering Indigo customers a system for charging their e-vehicle while they are parked**
- **Providing car drivers with local charging points in urban situations**

In line with the aims of the partnership, charging networks are located in a wide range of different situations: major stores, rail stations, hospitals, cultural venues, leisure areas, office blocks and shopping centres. Indigo charging points are currently distributed as follows:

- **190 charging points in Paris**
- **151 charging points across Ile de France**
- **159 charging points across the rest of France**

All points are intercommunicating and interoperable. This interoperability gives customers from various charging networks hassle-free access to our charging points.

“Indigo was the first parking provider to offer an electric vehicle recharging service. Since 2014, we have drawn on the expertise of IZIVIA in the field to assist us with this ambitious project. We aim to make life easier for car drivers who have decided to go electric and support local communities in their energy transition policy. The 500 points located throughout France support our vision of mobility in the future: durable, accessible and ergonomic” **said Sébastien Fraise, Executive vice-president and France Managing Director of Indigo.**

About Indigo

Indigo is a French group and the world leader for parking and individual mobility. Indigo employs 20,000 people across 11 countries and in over 750 cities. It is the only parking service operator present on four continents and in all parking segments: on-street, off-street and shared private car parks. Indigo operates more than 5,050 car parks throughout the world, with over 2.3 million parking spaces and over 3,000 km of on-street parking. Indigo provides services to both local authorities and private organisations (hospitals, shopping malls, train stations, airports, universities, etc.) and develops innovative mobility solutions to make it easier for users to get around their cities.

In June 2016, Indigo launched OPnGO, a unique application that offers its users a new parking experience, including a feature that searches for the best itinerary and then the best place at the best price. With OPnGO, the customer experience is based on greater freedom, more choice and personalisation.

Drawing on its experience in the field of on-street parking, Indigo created Streeteo at the start of 2017 in order to assist French local authorities in implementing the ‘on-street paid parking’ reform, seizing it as an opportunity to improve the fluidity of traffic in city centres.

Lastly, in October 2017, Indigo reached a new milestone with the launch of INDIGO Weel, thereby becoming the only French company to offer a station-less self-service bike-sharing system. This service is aimed at all the countries in which the Group operates.

Indigo is a global player with a local presence.

In a booming mobility market estimated to reach €100bn by 2025, Indigo is a key player as far as the mobility of the future is concerned. INDIGO. Making space for the future. www.group-indigo.com
